## **DETAILED ACTION**

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitation "plural slit pairs" (claim 15) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-14, 16 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Fine.

Fine discloses a lock nut with slits which are symmetrical with respect to the nut axis which define push parts 3 that are plastically deformed downwardly to deform the threads and provide an interference fit with a mating stud or bolt.

Art Unit: \*\*\*

Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by the Swiss patent to Krauchi.

The Swiss patent discloses the same type of lock nut as outlined above with symmetrical slits. In addition, the Swiss patent discloses the provision of plural sets or pairs of slits that are symmetrical (see Figure 5).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references to Patterson, King et al, Dziaba and the British patent disclose related lock nut structures and are cited to further show the state of the art.
